Bill,

I'm glad to hear about the progress, I will talk with Todd about that then.

I've talked with a couple of people that actually live on the site. I plan on talking with more sometime next week. Todd should have the list of people you are looking for. I haven't received that list yet.

Let me know if you have any more questions! Have a great day!

Eva,

I don't know about the lead on the site. I know our removal team is returning to the site the end of the month and I hope to go with them. They are considering a few things in regard to fencing. I was told they would be meeting with Todd.

I do have a couple of questions and would appreciate if you would share the following information. Did you talk to any of the individuals who actually live on the site? Do you have the names of the individuals that live on the site?

I hope to work with you on this and other Oklahoma sites in the future.

Thanks, Bill

Subject: Community Involvement Interviews

Hello Bill,

I've done a few interviews this week and here are some of the concerns that came up from the community so far.

People were mostly concerned about getting the site cleaned up before it gets to the point of being unusable. They don't want the site to hurt anyone else. They had health concerns, relating to lead health effects and cancers. Also, they were concerned about the city of Bristow since a Superfund site is such a negative stigma, they were concerned with the negative media hurting the city as far as growth and economy. All of the community members that I spoke with this week all said that they wanted to keep the site a residential area after the cleanup has been completed.

Do you have any updates on the Lead information?

That's all I have for now, I will update you when I get more interviews completed. Probably in the week after next week since Monday is a holiday. Let me know if you have any questions or concerns!
